

## RoHS and REACH Compliance Statement

Dalton Electric Heating Co., Inc. hereby declares that all products manufactured and supplied by our company are compliant with the requirements of both the European Union RoHS and REACH regulations as of November 2025.

### RoHS Compliance

Dalton Electric products are in full compliance with Directive 2011/65/EU (RoHS 2), as amended by Directive (EU) 2023/1437 and its consolidated version effective January 2025. Our heaters and assemblies do not contain restricted substances above the maximum concentration values permitted under Annex II of the Directive, and we continuously monitor updates to all relevant exemptions.

### REACH Compliance

Dalton Electric complies with Regulation (EC) No. 1907/2006 (REACH) and all subsequent amendments, including Regulation (EU) 2024/2462 covering PFHxA, its salts, and related substances under Annex XVII.

Our product portfolio is generally free of per- and polyfluoroalkyl substances (PFAS). A limited number of designs—less than 5 percent—utilize Teflon®-insulated lead wire made from Perfluoro(propyl vinyl ether)-tetrafluoroethylene copolymer (PFA, CAS 26655-00-5) at the direct request of certain customers. This fluoropolymer is not classified as a substance of very high concern (SVHC) and is not included in Annex XVII restrictions as of November 2025.

Dalton maintains supplier declarations confirming that these fluoropolymer materials are manufactured and processed without PFHxA-related substances or other restricted PFAS and that they remain compliant with current REACH requirements. We continue to monitor the ongoing EU PFAS restriction development to ensure future compliance and timely communication with affected customers.

This statement is provided in good faith based on information available from our suppliers and current legislative updates. Dalton Electric continues to monitor all relevant EU environmental and chemical safety regulations to ensure continued compliance.

Sincerely,

A handwritten signature in black ink, appearing to read 'Christopher A. Stevens'.
